About Us

OUR **STORY**,
OUR **PURPOSE.**

Accurate Inventory and Data you Can Trust.

ScanMe is a Dubai-based inventory and data integrity company, established in 2024 by professionals with over 15 years of combined experience in corporate inventory, ERP implementation, and warehouse operations. We started ScanMe because businesses had nowhere to turn when their stock records and their warehouse stopped agreeing. Today we count, verify, investigate, and correct inventory and ERP data for businesses across the UAE.

200+ projects across the UAE | **30M+ Inventory** units covered | **150+ Warehouses** and storage facilities

To make business data accurate, transparent, and actionable.

THE PROBLEM

We Solve

Most businesses in the UAE run on inventory numbers they cannot fully trust. Physical stock does not match system records. ERP data carries years of unreconciled adjustments, duplicate items, and outdated master data. The result is cash tied up in stock nobody can find, purchases of items already on the shelf, and financial statements built on figures nobody can verify.

How **We Work**

Count (structured physical audits), Verify (data validation), Analyze (ERP transaction review), Investigate (forensic root cause). You learn what you actually have, where the discrepancies are, and what needs to be corrected.

DISCOVER: We meet your team, visit the site, and identify the pain points.

DESIGN & AGREE: We propose a solution built for your operation, then agree the data request and the count or project rules.

RECONCILE: Match counted stock to ERP balances, item by item.

INVESTIGATE: Trace variances to their root cause and recount where needed.

REPORT & CORRECT: Closing form, variance report, corrected records, and recommendations.

What you receive

Tailored proposal | Audit-ready count report | Variance & root cause report
Corrected stock records | Control recommendations

Our Services

Everything Between the **Shelf** and the **System**

ScanMe covers the full path from physical stock to reliable data, and now to smarter decisions. Our 79 services are organized into 12 categories, so you can start where your need is greatest: a count, an investigation, a system fix, an AI upgrade, or an ongoing partnership. Every service is delivered by a team with hands-on experience in inventory, ERP, and warehouse operations.

COUNT, VERIFY & INVESTIGATE

Inventory Counting & Verification
Forensic Investigation & ERP Data Integrity
Asset Identification & Tracking Optimization

DATA, ADVISORY & SYSTEMS

Inventory Analysis, Compliance & Advisory
Inventory Data & Digital Transformation
Customized Application Solutions
ERP Solutions & Implementation

HARDWARE & SUPPLIES

Hardware & Device Supply
Barcode Labels & Asset Tags Supply

AI & INTELLIGENCE

AI-Powered Inventory Intelligence
Forecasting, anomaly detection, and smart data tools built on clean inventory data.

OPERATIONS & LAYOUT

Supply Chain, Operations & Outsourcing
Store Layout Design

INVENTORY COUNTING & VERIFICATION SERVICES

01

Accurate inventory for better control & decisions. Reliable counting, verification & audit-ready solutions.

01 PHYSICAL STOCK TAKING

Accurate counting by bar-code, item code, or part number.

02 PERIODIC STOCK COUNTS

Scheduled monthly or quarterly.

03 CYCLE COUNT PROGRAM

Continuous accuracy checks.

04 INVENTORY AUDITS & COMPLIANCE

Check that records align with your internal policies and applicable regulations.

05 INVENTORY HEALTH CHECK

Identify gaps & improve data.

06 YEAR-END & AUDIT SUPPORT

Counts timed and documented for external auditors.

07 STOCK SHRINKAGE INVESTIGATION

Investigate losses due to damage, theft, or mis-counting.

CAUSES OF STOCK SHRINKAGE:

Damage
Theft
Miscounting
Administrative errors

No barcodes? No problem. We count by item code/part number, so unlabeled stock is counted as accurately as labeled stock.

02 FORENSIC INVESTIGATION & ERP DATA INTEGRITY

When the system says one thing and the warehouse says another, we find out why. We trace discrepancies through ERP transaction histories, adjustments, and physical evidence, then deliver findings that management and auditors can act on.

08 FORENSIC INVENTORY INVESTIGATION

Trace unexplained variances to their source across transactions, transfers, and adjustments.

09 ERP TRANSACTION ANALYSIS

Review Oracle, Odoo, and other ERP movement histories for duplicates, misposted entries, and control gaps.

10 PHYSICAL VS SYSTEM RECONCILIATION

Match counted stock to ERP balances item by item, with every variance explained or flagged.

11 ADJUSTMENT & WRITE-OFF REVIEW

Examine manual adjustments and bulk transfers for patterns that need explanation.

12 ROOT CAUSE & CONTROL GAP REPORTS

Evidence-based reports showing what happened and where the process failed.

13 CORRECTIVE ACTION SUPPORT

Guidance to correct records and tighten controls so the gap does not reopen.

INVENTORY DATA & DIGITAL TRANSFORMATION 03

Clean, accurate inventory data is the foundation of efficient operations. we help businesses build, clean, migrate, and manage inventory data while implementing digital systems that ensure accuracy, reliability, and real-time visibility.

14 INVENTORY MASTER DATA CREATION

We build structured inventory master data including item codes, descriptions, units, categories, and attributes, ensuring accuracy and eliminating duplication and reporting errors.

15 ITEM MASTER & OPENING STOCK MIGRATION

Prepare item masters, locations, and opening stock balances for loading into any system, mapped and reconciled to a verified physical count before go-live.

16 DATA ENTRY & CREATION

We provide fast and accurate data entry services to populate or update inventory systems, ensuring clean, validated records.

17 DASHBOARD & REPORTING SETUP

We design real-time dashboards and automated reports that give you full visibility into stock levels, movement trends, discrepancies, and KPIs for better decision-making.

18 DATA CLEANSING & DEDUPLICATION

We clean your existing inventory database by removing duplicates, fixing inconsistencies, and standardizing formats for reliable and accurate reporting.

19 DATA QUALITY MANAGEMENT

We implement processes and tools to ensure ongoing data accuracy, consistency, and reliability across your inventory systems.

04 INVENTORY ANALYSIS, COMPLIANCE & ADVISORY SERVICES

For businesses seeking deeper visibility and control over inventory, we provide advanced analysis, compliance advisory, and strategic insights. Our services support informed decision-making, regulatory alignment, and accurate financial reporting.

20 DUE DILIGENCE INVENTORY ASSESSMENT

Verify inventory for mergers, acquisitions, and business transactions with high accuracy.

21 INVENTORY INSURANCE VALUATION SUPPORT

Accurate inventory valuation to support insurance coverage, claims, and risk management.

22 REGULATORY COMPLIANCE CONSULTING

Review your inventory practices against UAE requirements, such as MOIAT and Dubai Municipality where they apply, and close the gaps.

23 INVENTORY OPTIMIZATION

Optimize stock levels to reduce excess, avoid shortages, and improve cash flow.

24 INVENTORY KPI FRAMEWORK DEVELOPMENT

Create KPI frameworks for accuracy, turnover, and performance tracking.

25 DEAD STOCK & OBSOLETE INVENTORY ANALYSIS

Identify slow-moving stock and recommend recovery or disposal actions.

26 FINANCIAL REPORTING & AUDIT SUPPORT

Prepare structured reports to support audits and ensure transparency.

27 DATA ANALYTICS & INVENTORY INSIGHTS

Deliver insights using analytics for better decisions and fore-

SUPPLY CHAIN, OPERATIONS & OUTSOURCING SERVICES | 05

End-to-end operational support to improve efficiency, control, and scalability across your supply chain.

28 COLD CHAIN INVENTORY MANAGEMENT

Temperature-controlled inventory handling for accuracy, supporting quality preservation and cold chain requirements.

29 RETURNS & REVERSE LOGISTICS MANAGEMENT

Efficient handling of returns, inspections, restocking, and seamless reverse logistics.

30 SUPPLIER MANAGEMENT

Streamlined supplier coordination ensures on-time delivery, quality standards, and stronger partnerships.

31 INVENTORY SOP CREATION & PROCESS OPTIMIZATION

Standardize processes, eliminate inefficiencies, and drive consistency for better performance.

32 INVENTORY TEAM TRAINING

Practical training on receiving, counting, cycle counts, and record keeping for store and warehouse staff.

33 OUTSOURCED INVENTORY MANAGEMENT (RETAINER)

Managed inventory services with dedicated support, without the need for in-house overhead.

34 DEDICATED INVENTORY CONTROLLER PLACEMENT

On-site inventory professionals provide accurate tracking and daily inventory control.

35 REMOTE INVENTORY MONITORING & REPORTING

Real-time tracking, analytics, and custom reports for complete visibility from anywhere.

06 STORE LAYOUT DESIGN

Intelligent store layout design that optimizes space, improves flow, and enhances operational efficiency while ensuring safety and scalability.

36 LAYOUT PLANNING & ANALYSIS

Analyze operations, workflows, and space requirements to define efficient layout goals and strategies.

37 LAYOUT DESIGN & SIMULATION

Design multiple layout options and simulate product & people movement to validate the best solution.

38 SPACE OPTIMIZATION

Maximize storage capacity and utilize space effectively for smooth operations and accessibility.

39 PICKING ROUTE OPTIMIZATION

Optimize picking paths and reduce travel time to increase productivity and order fulfillment speed.

40 LAYOUT ADOPTION TRAINING

Train your team on new location codes, put-away rules, and picking routines.

41 LOCATION CODING & LABELING

Rack, bay, and bin labels mapped to your system for faster put-away and picking.

42 SAFETY & COMPLIANCE PLANNING

Plan safe working zones and layouts in line with applicable safety standards

43 LAYOUT IMPLEMENTATION SUPPORT

Provide guidance during implementation and continuous improvement for sustainable performance.

ASSET IDENTIFICATION & TRACKING OPTIMIZATION SOLUTIONS

07

Knowing where your assets are and tracking them accurately is fundamental to operational efficiency. Our solutions ensure every item—from raw materials to finished goods—is properly labeled, scanned, and traceable from receipt to dispatch.

44 ASSET TAGGING & VALIDATION

Custom asset tagging with accurate system mapping for reliable asset registers.

45 BARCODING SERVICES

Sync tag IDs, scans, and audit results with your ERP or FAR to keep records current.

46 RFID TECHNOLOGY

RFID tagging and reader solutions for automatic tracking with real-time visibility and faster operations.

47 ASSET REGISTER INTEGRATION

Integrate asset tracking with your ERP and inventory platforms for synchronized data and insights.

48 TAGGING & SCANNING TRAINING

Teach your team to apply, scan, and maintain tags and keep asset registers current.

49 AUDIT & DATA VERIFICATION

Conduct asset audits & data verification to ensure accuracy, reduce discrepancies & support audit readiness.

08 CUSTOMIZED APPLICATION SOLUTIONS

Smart software tailored to streamline and optimize your business operations.

50 INVENTORY MANAGEMENT

Track stock, locations, and re-al-time movement.

51 WAREHOUSE MANAGEMENT (WMS)

Efficient handling of receiving, picking, and dispatch.

52 ASSET TRACKING

Barcode, QR, and RFID-based asset monitoring.

53 SPREADSHEET-TO-APP CONVERSION

Replace fragile Excel trackers with secure web or mobile apps.

54 STOCK COUNT APPLICATION

Mobile counting and reporting built on S.M.A.R.T Engine.

55 APPROVAL & TRANSFER WORKFLOWS

Digital request, approval, and transfer flows for stock and assets.

56 MOBILE APPLICATIONS

Applications for handheld devices and field operations.

57 CUSTOM APPLICATIONS

Tailor-made software based on client requirements.

ERP SOLUTIONS & IMPLEMENTATION 09

End-to-end ERP solutions to streamline operations, validation at every stage, and enable smart business control.

58 ERP IMPLEMENTATION

End-to-end ERP implementation support to streamline business operations and improve system control.

59 EWM INTEGRATION SUPPORT

EWM integration support ensuring seamless data flow, accurate inventory, and efficient warehouse operations.

60 ERP DATA MIGRATION

Move masters, open transactions, and balances from legacy systems to the new ERP, with cutover planning and validation.

61 SYSTEM INTEGRATION

Connect ERP with all your business systems.

62 ERP SOFTWARE

SAP, Oracle, Odoo and other scalable solutions.

63 TRAINING & SUPPORT

User training and continuous support.

10 HARDWARE & DEVICE SUPPLY

We supply reliable, high-quality hardware and devices to support your inventory management operations.

OUR HARDWARE CATEGORIES

64 BARCODE SCANNERS

Fast and accurate scanning for effortless data capture and inventory tracking.

65 MOBILE COMPUTERS

Rugged mobile devices for real-time data access and field operations.

66 PRINTERS

Reliable printers for clear printing and smooth operations.

67 RFID DEVICES

Advanced RFID solutions for quick identification and inventory accuracy.

68 BARCODE TERMINALS

Durable terminals designed for efficient data entry and inventory control.

BARCODE LABELS & ASSET TAGS SUPPLY 11

Reliable labeling solutions for smart inventory management.

69 BARCODE LABELS

Direct Thermal Labels
Thermal Transfer Labels
Polyester Labels

70 ASSET TAGS

Aluminum Tags
Polyester Tags
Barcode Tags

71 CUSTOMIZED TAGS

Custom sizes & shapes
Logo printing
Serial Numbers / QR codes

12 AI-POWERED INVENTORY INTELLIGENCE

Your inventory data already holds the answers. We apply AI to forecast demand, catch errors early, and turn stock data into decisions you can act on.

72 DEMAND FORECASTING

Predict future demand from sales and movement history to plan stock with confidence.

73 SMART REPLENISHMENT

Reorder points and quantities driven by consumption patterns and supplier lead times.

74 ANOMALY DETECTION

Flag unusual adjustments, transfers, and variances for review before they become losses.

75 AI DATA CLEANSING

Detect duplicate items, misclassified products, and inconsistent descriptions in your item master.

76 DEAD STOCK PREDICTION

Identify slow-moving items early, so you can act before they become obsolete.

77 INVENTORY AI ASSISTANT

Ask questions about your stock in plain language and get answers straight from your data.

78 DOCUMENT AUTOMATION

Extract data from invoices, delivery notes, and goods receipts to cut manual entry.

79 VISION-BASED STOCK RECOGNITION

Identify and count items from images to speed up counts and spot checks.

AI works best on clean data. We start by getting your data right, then make it smarter.

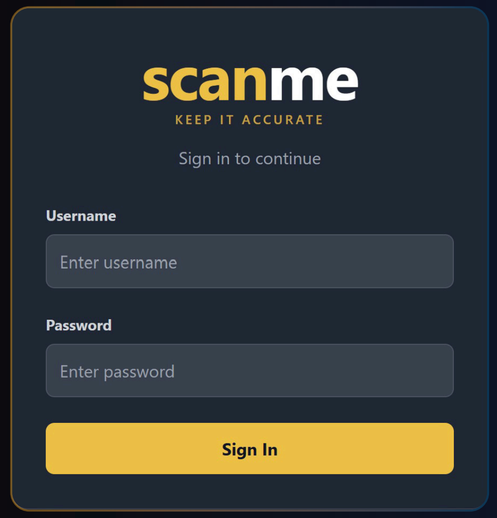
S.M.A.R.T Engine

SCANME AUDIT RECONCILIATION & TRACKING

ScanMe's proprietary **S.M.A.R.T** platform is the engine behind every engagement. Built and owned by ScanMe, it manages the full count lifecycle; from item setup and team assignment through to real-time scanning, reconciliation, and final reporting. No third-party software. No generic tools. A system purpose-built for inventory accuracy.

FEATURES:

Scan or Search, Audit-Ready, Reconciliation, Client Access Portal
Admin Control, Reports & Exports



OUR INDUSTRIES

Proud to support businesses across diverse industries.
Delivering smart inventory and asset management solutions.

INDUSTRIES WE SERVE

- **Retail, FMCG & E-commerce**
  Hypermarkets, convenience stores, mini markets, consumer goods
- **Manufacturing & Building Materials**
  Production, construction, infrastructure, chemicals, industrial supplies
- **Marine, Shipping & Shipbuilding**
  Marine equipment, ship repair, port and vessel supplies
- **Oil, Gas & Energy**
  Oilfield services, renewable energy
- **Logistics, Trading & Distribution**
  Warehousing, wholesale, import and export, cold storage
- **Automotive & Spare Parts**
  Parts trading, filters, industrial parts
- **Equipment & Machinery Rental**
  Rental fleets, tools, plant and machinery
- **Events, Entertainment & Hospitality**
  Event management, cinemas, hotels, restaurants, F&B
- **Healthcare & Pharmaceuticals**
  Hospitals, medical supplies
- **Corporate, Education & Institutions**
  Offices, banking, schools, facility management
